

Microcredential online course

Position yourself for the future by participating in our custom built collaborative and team based learning experience that will provide powerful insights into how telehealth and virtual care can reshape models of healthcare.

This online learning course has been designed by Dr. Audrey P Wang, a Senior Lecturer in Digital Health (Biomedical Informatics and Digital Health, Faculty of Medicine and Health) at the University of Sydney, to demonstrate how new and emerging technologies can enhance clinical decision making and change clinical outcomes.

You will receive detailed evidence based and ethical insights into how technologies such as video, wearable devices, smartphone apps, virtual reality programs, artificial intelligence and data analytics are shaping the future of healthcare from industry leading digital health academics and informatics leaders.

Course Facilitator

Dr. Audrey P Wang is co-located at the Westmead Health Precinct and collaborates with the Digital Health Cooperative Research Centre and the Local Health Districts. In addition, Audrey is the Group Lead for Digital Health Innovation (Collaborative) Lab and is a principal investigator for Fitness and Wellness Beyond the Hospital (FitWe) trial for older adults.

Tuesday 30 April – Tuesday 4 June 2024
